It doesn't matter where people are located, whenever people gather they will share personal stories, share their opinions, talk smack, tell jokes, and

talk about current events. That's what I am aiming for in this short. I was not intending to write about the coronavirus, but I thought it would be the most relevant at this time. In a sense, this may be a time capsule piece for future generations to have a glimpse of what we went through.

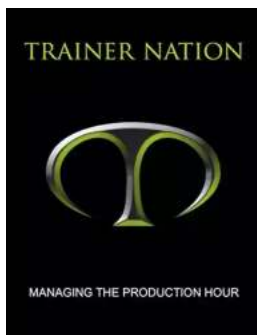

To be honest, I do not think of myself as a writer or an author or even a good storyteller for that matter. This is more of an inspirational nudge from a friend that recommended that I put my personal experiences in a book [after he jokingly threatened to steal my title].

I hope to entertain and challenge you a bit with the short.
