I decided to make this separate book of maps to accompany ‘Intrepid Dudettes of the Inca Empire’, because readers might want to refer to them at several points while reading, so I thought it could be useful to have them in a different file. The book refers to the maps of South America by number (e.g. Map 2) at points when you might want to take a look at them.

There are maps of countries, the empire itself and more detailed maps of specific parts of countries.
